Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

1. What Cinacalcet is and what it is used for
Cinacalcet contains the active ingredient cinacalcet, which works by controlling the levels of parathyroid hormone (PTH), calcium and phosphorous in your body. It is used to treat problems with organs called parathyroid glands. The parathyroids are small glands in the neck, near the thyroid gland, that produce parathyroid hormone (PTH). Cinacalcet is used to:

- treat secondary hyperparathyroidism in adults with serious kidney disease who need dialysis to clear their blood of waste products
- reduce high levels of calcium in the blood (hypercalcaemia) in adults with parathyroid cancer
- to reduce high levels of calcium in the blood (hypercalcaemia) in adults with primary hyperparathyroidism when removal of the gland is not possible

Cinacalcet is used in patients aged 18 years or over. It is not recommended that cinacalcet is prescribed for children as it is not known whether it is excreted in human breast milk. It is not known whether cinacalcet is excreted in human breast milk. If you are pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

2. What you need to know before you take Cinacalcet
Before you start taking cinacalcet, tell your doctor if you have or have ever had:
- seizures (fits or convulsions). The risk of having seizures is higher if you have had them before
- liver problems
- heart failure

Cinacalcet reduces calcium levels. Life threatening events and fatal outcomes associated with low calcium levels (hypocalcaemia) have been reported in adults and children treated with cinacalcet.

Please tell your doctor if you experience any of the following which may be signs of low calcium levels:
- spasms, tics, or cramps in your muscles, or numbness or tingling in your fingers, toes or around your mouth or seizures, confusion or loss of consciousness while being treated with Cinacalcet.
- Low calcium levels can have an effect on your heart rhythm. Tell your doctor if you experience an unusually fast or pounding heartbeat, if you have heart rhythm problems, or if you take medicines known to cause heart rhythm problems, while taking Cinacalcet.

For additional information see section 4.

During treatment with Cinacalcet, tell your doctor:
- if you start or stop smoking, as this may affect the way cinacalcet works

3. How to take Cinacalcet
Always take this medicine exactly as your doctor or pharmacist has told you. Check with your doctor or pharmacist if you are unsure. Your doctor will tell you how much cinacalcet you must take.

Cinacalcet must be taken orally, with or shortly after food. Tablets should not be chewed or crushed.

4. Possible side effects
Common side effects include:
- dizziness
- diarrhea
- nausea or vomiting

5. How to store Cinacalcet
Keep this leaflet. You may need to read it again.

6. Contents of the pack and other information
Cinacalcet is also available as granules in capsules for opening. Children who require doses lower than 30 mg, or who are unable to swallow tablets should receive cinacalcet granules.

Your doctor will take regular blood samples during treatment to monitor your progress and will adjust your dose if necessary.

If you are being treated for secondary hyperparathyroidism:

The usual starting dose for cinacalcet in adults is 30 mg (one tablet) once per day.

The usual starting dose of Cinacalcet for children aged 3 years to less than 18 years of age is no more than 0.20 mg/kg of body weight daily.

If you are being treated for parathyroid cancer or primary hyperparathyroidism:

The usual starting dose for cinacalcet in adults is 30 mg (one tablet) twice per day.

If you take more Cinacalcet than you should:

If you take more cinacalcet than you should you must contact your doctor immediately.

Possible signs of overdose include numbness or tingling around the mouth, muscle aches or cramps and seizures.

If you forget to take Cinacalcet:

Do not take a double dose to make up for a forgotten dose.

If you have forgotten a dose of cinacalcet, you should take your next dose as normal.

If you have any further questions on the use of this medicine, ask your doctor, pharmacist or nurse.

4. Possible side effects

Like all medicines, this medicine can cause side effects, although not everybody gets them.

Please tell your doctor immediately:

- If you start to get numbness or tingling around the mouth, muscle aches or cramps and seizures. These may be signs that your calcium levels are too low (hypocalcaemia).
- If you experience swelling of the face, lips, mouth, tongue or throat which may cause difficulty in swallowing or breathing (angioedema).

Very common: may affect more than 1 in 10 people

- Nausea and vomiting, these side effects are normally quite mild and do not last for long.

Common: may affect up to 1 in 10 people

- Dizziness
- Numbness or tingling sensation (paraesthesia)
- Loss (anorexia) or decrease of appetite
- Muscle pain (myalgia)
- Weakness (asthenia)
- Rash
- Reduced testosterone levels
- High potassium levels in the blood (hyperkalaemia)
- Allergic reactions (hypersensitivity)
- Headache
- Seizures (convulsions or fits)
- Low blood pressure (hypotension)
- Upper respiratory infection
- Breathing difficulties (dyspnoea)
- Cough
- Indigestion (dyspepsia)
- Diarrhoea
- Abdominal pain, abdominal pain – upper
- Constipation
- Muscle spasms
- Back pain
- Low calcium levels in the blood (hypocalcaemia)

Not known: frequency cannot be estimated from the available data

- Hives (urticaria)
- Swelling of the face, lips, mouth, tongue or throat which may cause difficulty in swallowing or breathing (angioedema)
- Unusually fast or pounding heart beat which may be associated with low levels of calcium in your blood (QT prolongation and ventricular arrhythmia secondary to hypocalcaemia)

After taking cinacalcet a very small number of patients with heart failure had worsening of their condition and/or low blood pressure (hypotension).

Reporting of side effects

If you get any side effects, talk to your doctor, pharmacist or nurse. This includes any possible side effects not listed in this leaflet. You can also report side effects directly via Yellow Card Scheme, Website: www.mhra.gov.uk/yellowcard or search for MHRA Yellow Card in the Google Play or Apple App Store. By reporting side effects, you can help provide more information on the safety of this medicine.

5. How to store Cinacalcet

Keep this medicine out of the sight and reach of children. Do not use this medicine after the expiry date which is stated on the label, carton and blister after EXP. The expiry date refers to the last day of that month.

This medicine does not require any special storage conditions.

Do not use this medicine if you notice any change in the appearance of the tablets.

Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use. These measures will help to protect the environment.

6. Contents of the pack and other information

What Cinacalcet contains

- The active substance is Cinacalcet.
- Cinacalcet 30 mg film-coated tablets Each film-coated tablet contains 30 mg cinacalcet (as hydrochloride).
- Cinacalcet 60 mg film-coated tablets Each film-coated tablet contains 60 mg cinacalcet (as hydrochloride).
- Cinacalcet 90 mg film-coated tablets Each film-coated tablet contains 90 mg cinacalcet (as hydrochloride).
- The other ingredients are:
  - Tablet core: Starch, Pregelatinised (Maize starch), crospovidone (Type-A), cellulose, microcrystalline (Grade -102) silica colloidal anhydrous and sodium stearyl fumarate.
  - Tablet coating: Lactose monohydrate, hypromellose 2910 (E464), titanium dioxide (E171), triacetin, iron oxide yellow (E172), Indigo cancerine aluminium lake (E132), macrogol 6000 (E1521) and macrogol 400 (E1521).

What Cinacalcet looks like and contents of the pack

Cinacalcet 30 mg film-coated tablets

Light green, oval shaped, biconvex, film-coated tablets debossed with “CN” on one side and “30” on the other side. The size is 5.9 x 6.2 mm.

Cinacalcet 60 mg film-coated tablets

Light green, oval shaped, biconvex, film-coated tablets debossed with “C” and “N” on either side of break line on one side and “60” on the other side. The tablet can be divided into equal doses. The size is 12.4 x 7.8 mm.

Cinacalcet 90 mg film-coated tablets

Light green, oval shaped, biconvex, film-coated tablets debossed with “C” and “N” on either side of break line on one side and “90” on the other side. The tablet can be divided into equal doses. The size is 14.2 x 8.9 mm.

Cinacalcet film-coated tablets are available in blister packs.

Pack sizes

Blister packs: 14, 28 and 84 film-coated tablets. Not all pack sizes may be marketed.
