If you are a woman of child-bearing age:

Pregnancy

Ambrisentan may harm unborn babies conceived before, during or soon after treatment.

If you are a woman:

- You must not take Ambrisentan if you are pregnant, or if you are planning to become pregnant
- Women of reproductive potential must use reliable contraception whilst taking Ambrisentan
- It is preferable that you and your partner use two forms of contraception that work in different ways - If you are in any doubt about which contraceptives to use, consult your doctor or contraceptive clinic
- A pregnancy test should be taken every month
- If you miss a period, or if you think you may be pregnant, you must tell your doctor straight away

For all patients: Liver Function Blood Test

Ambrisentan may cause liver injury.

It is important to have blood tests to monitor your liver function before starting treatment and at regular intervals during treatment to check that your liver is working properly. Monthly liver function tests are recommended.

Record below your monthly test schedule:

Pregnancy	Liver Function	Pregnancy	Liver Function
Jan _____	_____	July _____	_____
